

CHERRINGTON TRACK SCREENERS

For a Rock Free Cushion

HORSE TRACKS, ARENAS, AND TRAINING TRACKS

Screen out Rocks & Debris, Clean & Condition -
All in One Pass!

Screen 1/2" or less while loosening and conditioning your track or arena for a stone-free cushion.

100% EFFICIENT!

Cherrington Screeners screen to your predetermined depth - from 1" to 6".

Anything larger than the screen hole size is loaded into the hopper while the cleaned cushion is returned to the track.

Dangerous stones and debris removed from horse tracks with Cherrington Screeners.

A Cherrington will Screen-Clean rocks from your track as well as if it were picked-up, transported and screened at a stationary plant.

Cherrington offers models with 4ft to 6ft screening widths.

Tractor and self-propelled models are offered with either ground dump or high lift for loading into trucks.

CHERRINGTON HAS THE RIGHT SIZED SCREENER FOR YOUR TRACK OR ARENA

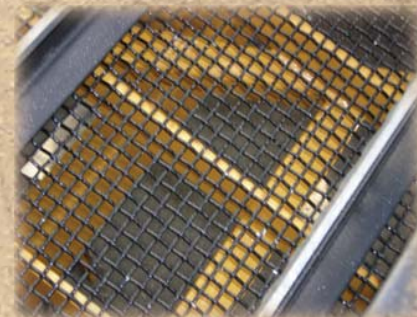

Loading paddles carry the cushion up and over the oscillating screen.

Anything larger than the selected screen hole size is loaded in the hopper and the cushion is returned to the track.

Perfect for cleaning up walkways and paddock areas, too.

Select the screen hole size that you need.

Sifting screens are available in many sizes and are easily changed.
